

An Independent Review of GCF's Results Management Framework (RMF)

The GCF's RMF facilitates the monitoring and evaluation of outputs, outcomes and impacts of the Fund's investments and portfolio, including its organisational effectiveness and operational efficiency.

The RMF is based on indicators and systems that support the Fund's operations, including its economic,

social and environmental co-benefits and gender sensitivity.

Why is the RMF being reviewed?

The GCF Board requested the IEU at the nineteenth meeting to carry out a review of the RMF. The IEU will distil lessons from the application of the RMF, draw insights on the capacity and needs of country partners and the Fund, and provide recommendations to improve the efficiency and effectiveness of the Fund's results management framework.

Learning objectives of the RMF Review

- What are we learning from the *design* of the GCF's results management framework?
- What are we learning from the *αpplication* of the RMF to GCF's funding proposals?
- What are we learning from the RMF about GCF's projects under implementation?

Methods and Timeline for the Review

The review will use bottom-up and top-down inquiries with the objective of integrating perspectives across the spectrum of GCF stakeholders, including Secretariat staff, NDAs, Accredited Entities, and delivery partners. The review will use a range of instruments, including:

- A review of key documents
- Benchmarking the RMF against best international experience
- Interviews with key informants

- Focus group discussions
- Online surveys and webinars
- Case studies in the field

The main data collection and analysis will take place during June and July 2018. A draft review report will be available for stakeholder consultations by the end of August 2018. The final review and recommendations for Board consideration will be available at the 21st Meeting of the GCF Board.
